

## DEPLOY IN KUBERNETES CLUSTER

The screenshot shows the IBM Cloud Kubernetes cluster overview page for a cluster named 'plasma-donor'. The cluster is in a 'Normal' state and is scheduled to expire in 29 days. A warning message states: 'Expires in 29 days: Be sure to back up your data, your cluster will be deleted in 29 days. To access the full capabilities of the service, try out a [standard cluster](#).' The overview includes four status cards: Node status (1 of 1 Normal), Add-on status (0 of 0 Normal), Master status (Normal), and Ingress status (Healthy). Below these is a 'Details' section showing the Cluster ID (cdcrxv1f0rkj6247fsg), Version (1.24.8\_1544), Infrastructure (Classic), and Zones (Milan 01). The left sidebar shows navigation options: Overview, Worker nodes, Worker pools, and DevOps. The top navigation bar includes the IBM Cloud logo, a search bar, and links to Catalog, Manage, and the user's account (Rishika M's Account).

The screenshot shows the IBM Cloud Resource list page. The page displays a table of resources categorized by type. The 'Containers' section is expanded, showing two resources: 'plasma-donor' and 'ps-app'. The 'plasma-donor' resource is a Kubernetes Service located in Frankfurt, and the 'ps-app' resource is a Container Registry located in London. The table has columns for Name, Group, Location, Product, Status, and Tags. The left sidebar shows navigation options: Compute, Containers, Networking, Storage, AI / Machine Learning, Analytics, and Blockchain. The top navigation bar includes the IBM Cloud logo, a search bar, and links to Catalog, Manage, and the user's account (Rishika M's Account).
